To Whom It May Concern

As per your request, I've checked the weight per 1000 slates for Del Carmen Heavy slate in size 500x250mm and it is 2500kg.

I also consulted our Technical Manager, Richard Cook, who suggested that the weight per square meter is approximately 47.7kg.

For additional information about the Del Carmen slate, please take a look at the brochure here:

Should you have any further questions, please let us know.

Best regards,
